- First aid kit
- Navigation (map / compass)
- Drinking water
- Cooking equipment

billy, stove, gas, matches, fire lighter, cutlery, spondonicals

- Personal hygiene

toilet paper / baby wipes, trowel, hand sanitiser

This document (which should be read in conjunction with: <http://fatcanyoners.org/bush-guide/canyoning-equipment-list/>) provides an overview of the gear you'll need to canyon safely and enjoyably. Be aware that this equipment list is based on the conditions in Australian canyons, where water flows are generally limited, temperatures are warmer, and you are unlikely to have to deal with specialist problems like 'keeper' potholes. The techniques, and therefore gear requirements, will inevitably vary slightly for canyons from different regions around the world.
